PRINTABLE WALLCOVERINGS & WINDOW FILMS

Sourced specifically for the architecture and design industry our digital print patterns can be supplied on a range of wallcoverings, window and frosting films. Our designs can be customised, resized and rescaled, to compliment your design scheme. We also work with custom designs and artworks as required. All products are flame retardant and suitable for commercial use.

KANDINSKY

HIGH PERFORMANCE PVC FREE WALLCOVERING

COMPOSITION: non-woven paper backed
WEIGHT: 225 gsm
TEXTURE: Light texture
PRINTABLE WIDTH: 127cm
PATTERN REPEAT: varies per design
APPLICATION: Wallcovering
FEATURES: PVC Free and solvent free green manufacturing | Smooth back for better wall adhesion | Paste to wall | minimal shrinkage | good scratch resistance
LIGHT FASTNESS: Blue wood scale up to 6 - 6 (= 15 - 50 years indoor)
FIRE CERTIFICATION: AS5637.1 - Group 2
SPECIAL FEATURES: PVC free and solvent free manufacturing = green and odourless

This hospital grade wallcovering is suitable for all commercial projects including aged care and medical fitouts.

With a high scratch resistance, this substrate is easy to clean and can be wiped down with damp cloth., therefore being able to handle limited exposure to water. This product is frequently specified in bathrooms, amenities and parents rooms, and it can endure high temperature steam cleaning processes carried out in medical environments.

SELF ADHESIVE VINYL - WHITE/ OPAQUE
SMOOTH GRAPHIC VINYL FILM AVAILABLE IN MATT AND GLOSS LAMINATE FINISH

COMPOSITION: Vinyl
BASE COLOUR: White opaque
TEXTURE: Smooth
PRINTABLE WIDTH: 127cm - 130cm
PATTERN REPEAT: varies per design
APPLICATION: Wallcovering & suitable for installation on glass (smooth, flat and compel curved surfaces). Also suitable for application onto metal and rigid plastic.
ADHESIVE TYPE: Pressure-sensitive
FIRE CERTIFICATION: AS5637.1 - Group 1

This vinyl with a self adhesive backing can be used in areas with frequent exposure to water. This product can also be applied to outdoor walls with UV stability and performance for a minimum period of 5 years.

A matt or gloss laminate coating can also be applied to the vinyl.

Vision strips can be incorporated into the designs if required for use on doors or windows.

MAINTENANCE AND CLEANING:
Use a cleaner designed for high-quality printed surfaces. The cleaner must be wet, non-abrasive, without solvents and have a pH value between 3 and 11 (neither strongly acidic nor strongly alkaline).

SELF ADHESIVE VINYL - CLEAR

SMOOTH GRAPHIC VINYL FILM AVAILABLE IN MATT AND GLOSS LAMINATE FINISH
AVAILABLE WITH WHITE INK FOR A MORE VIVID PRINT RESULT & OPAQUE MOTIFS IN SOME AREAS

COMPOSITION: Vinyl
BASE COLOUR: Clear
TEXTURE: Smooth
PRINTABLE WIDTH: 127cm - 130cm
PATTERN REPEAT: varies per design
APPLICATION: Glass (smooth, flat and curved surfaces). Also suitable for application onto metal and rigid plastic.
ADHESIVE TYPE: Pressure-sensitive
FIRE CERTIFICATION: AS5637.1 - Group 1

FEATURES: Prints can be applied at varying levels of transparency | White ink can be incorporated into the prints to provide a vivid and blood print result, or the prints can be applied without white ink for a more transparent and subtle finish. Combination of both of the above can also be applied - for example: opaque/ bold colour motifs with a clear back

A matt or gloss laminate coating can also be applied to the vinyl.

Vision strips can be incorporated into the designs if required for use on doors or windows.

MAINTENANCE AND CLEANING:
Use a cleaner designed for high-quality printed surfaces. The cleaner must be wet, non-abrasive, without solvents and have a pH value between 3 and 11 (neither strongly acidic nor strongly alkaline).

OPTICALLY CLEAR WINDOW FILM

WINDOW FILM THAT DOES NOT OBSCURE THE CLARITY OF THE UNDERLYING GLASS

A 50 micron ultra clear polyester which has an ultra clear solvent based adhesive that allows it to be "floated" onto the glass..

Limited privacy and screening solutions can be created on glazing using Optically Clear Film using colour and pattern.
Printed areas appear diffused and 100% visual clarity is achieved on unprinted areas.

EMILY ZIZ

OLSEN - FROSTING FILM
WINDOW FROSTING/ VINYL FILM WITH A SILVER ETCH BASE

Extensive visual privacy is achieved with frosted film which also serves as a light diffuser.
The medium glossy surface inhibits undesired reflection.

PRODUCT FEATURES:
Face: Thickness: 80 Microns (without paper and adhesive)
Adhesive: Solvent Polyacrylate, Permanent
Temperature Resistance: -40 to 90 degrees celsius

BENEFITS:
- 80 Micron
- Polymeric
- Calendared Film
- Durability: 7 Years

FIRE CERTIFICATION: Group 1 - AS 5637.1

APPLICATION: Wet application

Surfaces to which the material will be applied must be thoroughly cleaned and free from dust, Greece or any other contamination that would affect the adhesion of the material. Freshly lacquered or painted surfaces should be allowed to dry for at least three weeks and to completely cure. The compatibility of selected lacquers and paints should be tested by the user, prior to the application of the material.

REEDED GLASS FILM

WINDOW FILM

Reeded glass film to be used as an alternative for reeded glass.

15mm wide bands which present a subtle magnified and mirrored effect within the ribbing..The distortion adds an extra layer of privacy while still allowing ample natural light to illuminate your space, resulting in the perfect balance between seclusion and brightness.

EMILY ZIZ
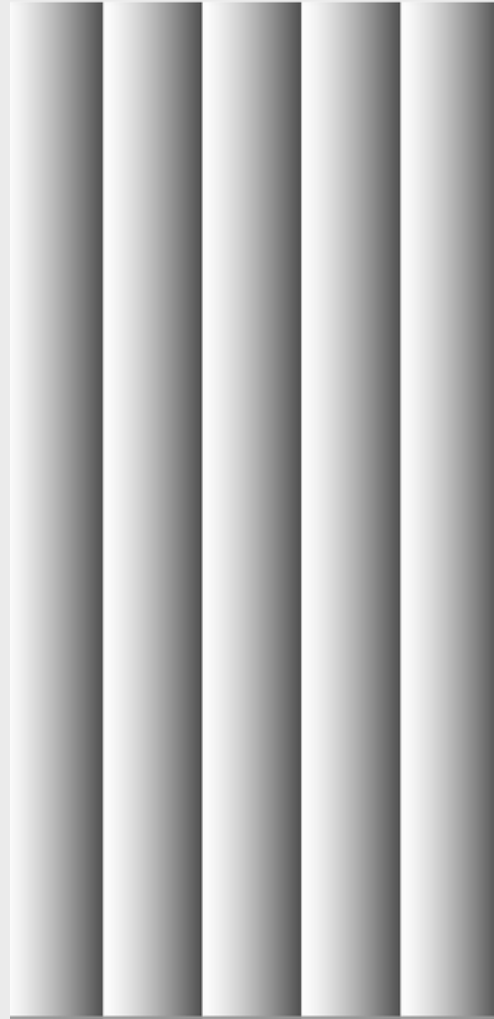

CUSTOM REEDED GLASS FILM

PRINTED WINDOW FILM

A printed glass film designed to be used as an alternative for reeded glass and traditional reeded glass film.

The frosted look of this film provides complete opacity while still allowing the gentle pass through of light.

Being a proprietary product this film can be fully customised to meet the needs of your project.

Constructed with 15mm wide bands this glass film enhances privacy without compromising on illumination. Whether you require specific dimensions or patterns, or other modifications, we can work with you to achieve your desired project objective.

FADE EFFECT FILM - 2 POINT

PRINTED OPTICALLY CLEAR WINDOW FILM

The 2 Point Fade decorative window film is designed to take a fresh take on window treatments combining aesthetic appeal with customisable features.

The ''2 Point'' refers to the measurement points where the opacity of the film transitions creating a fade effect from opaque to clear. This enables an interesting design result as well as a practical purpose and offers the ability to achieve a balance between coverage and visibility.

By enabling privacy where you need it most the film offers visibility at standing eye level while striking the perfect balance between architectural aesthetics and functional transparency..

This film can be produced in a wide range of colours and custom colours.
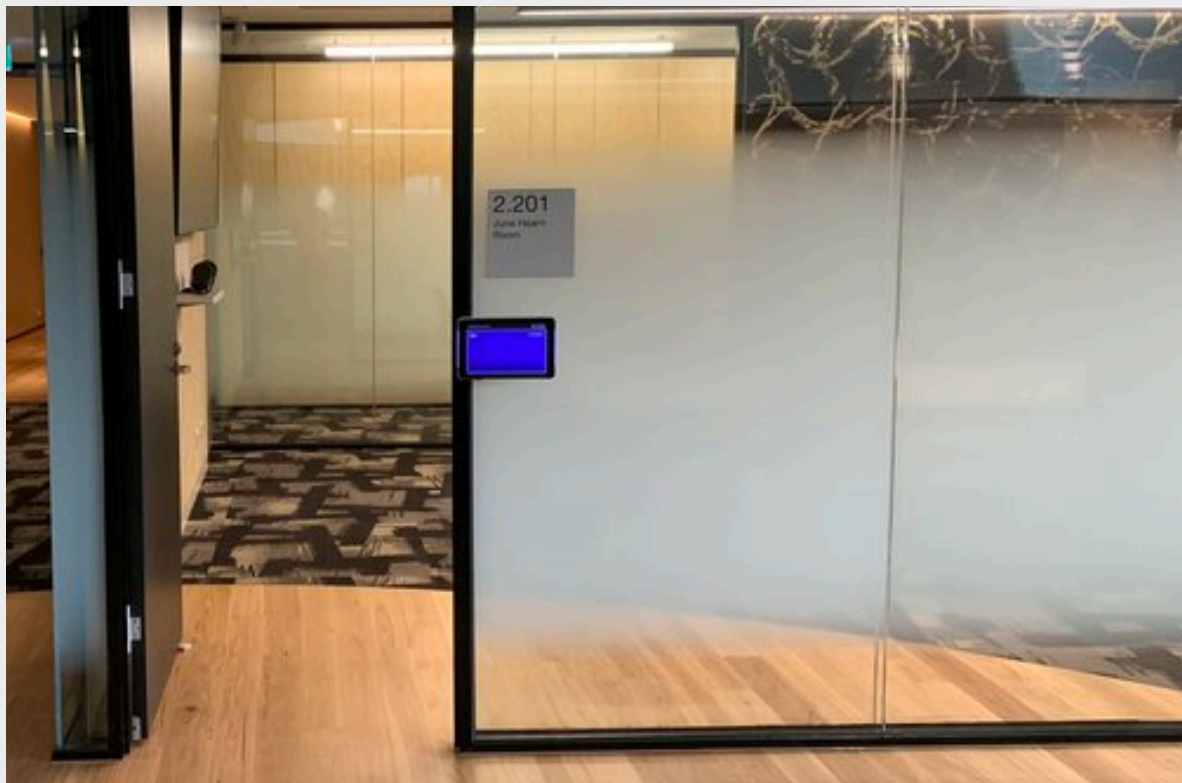

FADE EFFECT FILM - 4 POINT

PRINTED OPTICALLY CLEAR WINDOW FILM

The 4 Point Fade decorative window film is designed to take a fresh take on window treatments combining aesthetic appeal with customisable features. With the 4 Point Fade Effect you have the option to select from a wide range of colours and opacity levels.

With its four strategically placed measurement points this film creates an impressive fade effect transitioning from clear to opaque and back to clear, resulting in an impressive design feature while serving a practical purpose.
The 4 Point Fade Effect range ensures visibility at both standing level and eye level . Its versatility makes it an ideal option for applications where design and functionality are of equal importance.Talk with us to discuss how the 4 Point Fade Effect Rage can be customised to suit your project needs.
